

White House demanding action and shortly after, the Bruins received a congratulatory telegram from President Nixon along with a declaration that the Boston Bruins were number one.

Jim was also part owner and president of Foxboro Raceway which was eventually sold to become part of Gillette Stadium.

He loved to read, run on Nantasket beach, travel with Patricia and play tennis with his buddies. He was handsome with blue eyes that twinkled and was always impeccably dressed. He loved the saltwater and his idea of bliss was a hotdog, a cold beer and the sea. He was a devoted and adoring husband, father and grandfather and will be missed dearly.

One of his seven grandchildren, Ethan, works for me in Washington. A celebration of Jim's life will be held September 11th.

Madam Speaker, please join me in remembering the life of James Joseph McCarthy.

HONORING MS. ALLISON F.  
STILLER, UNITED STATES NAVY

**HON. JOE COURTNEY**

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 9, 2019*

Mr. COURTNEY. Madam Speaker, I rise today to honor Ms. Allison F. Stiller, who is retiring from the Department of the Navy after more than 30 years of faithful civilian service to our nation, culminating as the Principal Civilian Deputy to the Assistant Secretary of the Navy for Research, Development & Acquisition, ASN(RD&A), for the past four years.

Ms. Stiller's contributions to the Department of the Navy have been numerous. Her responsibilities include oversight and policy for Navy and Marine Corps research, development, and acquisition programs for shipbuilding, aviation, space, weapon systems, ground vehicles, munitions, and communication systems. This portfolio includes oversight of more than 100,000 people with an annual budget in excess of \$50 billion as well as hundreds of technical developments and procurement programs for the Department of the Navy. Ms. Stiller served as the acting ASN(RD&A) from January through July 2017, and leads the Department's Senior Executive Acquisition Corps. She is also the proud ship sponsor for USS *Mississippi* (SSN 782).

In performing her duties as Deputy to ASN(RD&A), Ms. Stiller regularly appeared before the House Armed Services Committee and the Seapower and Projection Forces subcommittee, which I chair, consistently offering valuable insight and testimony and enhancing Congressional understanding of the programs under her purview. She has been a true advocate for the Navy, and I can attest that my colleagues and I very much appreciated and benefited from her expertise.

Ms. Stiller entered the Senior Executive Service in January 2004. Prior to her current position, she served as the Deputy Assistant Secretary of the Navy for Ship Programs. In this capacity, she was responsible for executive oversight of all naval shipbuilding and associated weapon systems programs, major ship conversions, and nuclear ship refuelings, as well as the maintenance, modernization and disposal of in-service ships. During her

tenure, 96 ships and submarines were placed under contract and 70 ships and submarines were delivered to the operational Fleet, representing approximately 25 percent of today's operational battle force.

Ms. Stiller has served in a number of shipbuilding acquisition positions throughout her career where she led in the development and procurement of complex ship programs in multiple phases of the acquisition life cycle. She served for four years as the Deputy Program Manager in the Amphibious Warfare Program Office, responsible for design, development, acquisition, and fleet introduction of amphibious ships and landing craft. Ms. Stiller also served as Director for Naval and Commercial Construction in the Office of the Assistant Secretary of the Navy for Ship Programs where her responsibilities included oversight of amphibious and auxiliary ship construction and conversion programs, as well as shipbuilding industrial base matters. During her tenure, Ms. Stiller helped develop and promote initiatives that focused the nation's shipbuilding industry towards commercial viability. Ms. Stiller also served as Acquisition Manager in the early phases of the Virginia Class Submarine Program, as well as division director in the Seawolf Submarine program during the design and early construction phases of that program.

Ms. Stiller holds a BS in Systems Engineering from the University of Virginia and a MS in Engineering Management from Virginia Tech. She is also a graduate of the John F. Kennedy School of Government's Senior Executive Fellows Program at Harvard University and the Defense Systems Management College.

Throughout her career, Ms. Stiller's leadership and performance has been recognized by numerous awards including the Presidential Rank Award (Distinguished and Meritorious) and the Department of the Navy's Superior and Meritorious Civilian Service awards.

I am proud to recognize Ms. Stiller, and I thank her and her family for her honorable service to our nation. Madam Speaker, I ask my colleagues to join me in wishing Ms. Allison Stiller 'fair winds and following seas' as she concludes a distinguished career of public service.

RECOGNITION OF MALCOLM S.  
MORRIS

**HON. EARL BLUMENAUER**

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 9, 2019*

Mr. BLUMENAUER. Madam Speaker, I rise today in recognition of Malcolm S. Morris as he ends his long chairmanship of the Millennium Water Alliance, which he helped to found seventeen years ago. His career is marked by his astounding work for this country and for millions of the world's poorest people as a longtime advocate for safe drinking water and sanitation.

The Alliance is unique in the global water sector—it includes as members fifteen leading U.S. charities that help international governments and other organizations bring safe drinking water and sanitation systems to millions in Africa, Latin America, the Middle East, and Asia. It forges new relationships to accelerate this effort, and works with USAID to help

advance America's interest in reducing poverty and increasing stability and opportunity for millions.

Malcolm advocated for water as the foundation of development and for peace building at a time when the U.S. Government was paying little attention to this issue. In particular, Malcolm has been a strong voice among his fellow conservative Republicans, urging more of them to join in this effort, and to seek common ground with those of us across the aisle in supporting foreign assistance to truly help advance our common goals in the world.

His first step was to set up an international faith-based NGO in his home state of Texas, and to recruit colleagues and friends who were equally passionate. Under his leadership, some gave up well-paying jobs to do "God's work". To this day that NGO, Living Water, organizes mission trips to introduce people firsthand to the potential and challenges of development work—work that increases the reputation and soft power of the United States, community by community.

Realizing that the private sector was a relatively untapped source of funding for water work, Malcolm organized a "Millennium Water Challenge" in 2002. As a CEO active in the national business community, he invited his fellow CEOs to join him at an event in Houston. A number of CEOs turned up and many more sent representatives, setting an early example in involving major corporations in water, sanitation, and hygiene issues. Because of his leadership, several well-known U.S. corporations and brands are now involved in global efforts to address water, sanitation, and hygiene.

Perhaps, Malcolm's greatest contribution has been his insistence that USAID should play a bigger role in increasing access to water in the developing world. He believed that the U.S. Government, U.S. corporations, and U.S. civil society together could make a significant contribution to addressing the challenges facing millions of the world's poorest people. In 2002 he founded the Millennium Water Alliance, with the objective of transforming people's lives through improving access to safe water, improved sanitation, and good hygiene practices.

Malcolm then played a major role with others in the helping to pass the 2005 Paul Simon Water for the Poor Act and devoted much of his time to encouraging members of Congress to fund this legislation. He also worked with the Alliance and used his political connections both in the U.S. and overseas to set up innovative water, sanitation, and hygiene programming in Kenya, Ethiopia and Central America.

His enduring legacy is someone who built up political capital as an innovative business leader and used a significant part of that capital for the benefit of poor and marginalized people in the developing world. It is, as he would say, "God's work".

IN RECOGNITION OF THE 50TH  
WEDDING ANNIVERSARY OF  
HENRY AND LONA MULLINAX

**HON. MIKE ROGERS**

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 9, 2019*

Mr. ROGERS of Alabama. Madam Speaker, I ask for the House's attention to recognize
